

Staunton Team Overview

BBC RESEARCH & CONSULTING - Business Planning

Founded in 1970, BBC provides economic, financial, statistical, market and policy research and advisory services to businesses and governmental interests nationwide. BBC's experience includes tourism, recreation and resort development; real estate development and planning; and water, energy, mineral and related resource industries. In recent years BBC has conducted a number of financial feasibility analyses for public and non-profit organizations. For the Staunton Park plan, BBC will be evaluating the feasibility and revenue generation characteristics of possible recreation uses, accommodation alternatives and special purpose facilities.

INTERMOUNTAIN CORPORATE AFFAIRS - Public Outreach

InterMountain Corporate Affairs ranks as one of the Rocky Mountain region's most effective public affairs and strategic communications firms. InterMountain specializes in the design, coordination and management of multi-tiered communications programs that foster a thoughtful exchange of ideas among project experts, elected officials, regulators, targeted stakeholder groups, the general public and the media. The firm has developed and managed such efforts for a number of government and private sector clients around the region - with a particular focus on complex land use, recreation, transportation and real estate development projects that require a high degree of sensitivity and sophistication in their communications.

ARCHITECTURAL ENERGY CORPORATION - Sustainability (LEED)

Architectural Energy Corporation (AEC) is a leading energy engineering firm concerned with energy, buildings and the environment. The mission of AEC is to hasten the transition to a sustainable economy by assisting our clients to improve the energy efficiency, environmental responsiveness, and use of renewable energy in their new and existing buildings. This mission is accomplished through a comprehensive and innovative suite of professional services and products that enable our clients to achieve and to maintain peak energy and environmental performance over the life of their buildings. AEC is a nationally and internationally recognized leader in energy, daylighting and sustainable design consulting. AEC staff members are LEED Accredited Professionals and can assist the design team and the building owner to obtain LEED Certification from the U.S. Green Building Council.

ERO RESOURCES - Environmental Planning

ERO Resources Corporation is a natural resource consulting firm based in Denver. ERO is a recognized leader in natural resource evaluation, open space and trail planning, environmental impact assessment, and environmental permitting. ERO specializes in projects that balance community infrastructure needs with the conservation and stewardship of natural resources. ERO's resource specialists are widely recognized for their technical knowledge, while their planning staff has considerable experience in translating science into effective planning, implementation, and policy. This interdisciplinary approach will enable ERO to facilitate a planning process for Staunton State Park that achieves a balance between sustainable park development and natural resource conservation.
